

9. Make a picture book of all the plants and animals in your neighbourhood – even your pets. Find out what happens to them if they get too much dirty water or air. Ask a grownup to help.

10. Start a school project. Cut out pictures from magazines of things that make pollution or dirty air and water. Cars make dirty air. Factories make dirty air. What else can you think of? Find out where all the different kinds of dirty air and water come from.

Now, remember: "Think clean. Think green!"

ENVO and his sister ENVA

This is Envo and Enva. They come from the plane Verita which is far, far away from Earth. Once Verita was very dirty and polluted. Everyone decided to work hard to clean up the water and they did. Verita is beautiful once again! Now, Earth is having the same problems. Envo and Enva like Earth, so here they are to help us clean up. Envo says, "Think Clean. Think Green!"

WHAT YOU CAN DO TO PROTECT YOUR PLANET:

1. Pick up paper lying around outside and put it in the garbage can. Bring your bottles and pop cans home and put them in your Blue Box.

2. Think about how far you have to walk somewhere. Does somebody really have to drive you there? Gasoline from cars makes dirty air. Instead of driving, ask mom or dad to walk to the corner store with you.

It may not be reproduced, in all or in part, for any commercial purpose except under a licence from the Queen's Printer for Ontario.

For information on reproducing Government of Ontario works, please contact ServiceOntario Publications at copyright@ontario.ca

3. Reuse. Use empty cans for crayon and paintbrush holders.

6. Save water. Don't leave the water running so long when you wash your hands. Use soap but keep the water off until you're ready to rinse it off.

4. Don't throw out plastic bags. You can reuse them to hold:

Library and
school books

Lunch

Toys

7. If you need warm water, turn the cold water tap on first and then slowly turn on the hot tap until the water is warm enough. This uses less hot water and saves energy we could use for other things.

5. Use cardboard egg cartons for storing rocks. Collect them when you go for walks. It's fun to look at them and study them closely on a rainy day. You can paint pictures on some rocks.

8. Ask for a napkin or a paper plate to hold your hamburger next time you're eating at a restaurant. Foam packages can hurt water and air.
